Experience

redSling **Remote**
Software Developer **Sep 2024 – Present**

- Architected a Docker-build pipeline that reduced developer setup time by **80%** and enabled parallel container exports.
- Implemented a reverse-proxy API for FatZebra payments, resolving CORS issues and accelerating integration throughput by **3×**.
- Optimized page payloads with Terser, reducing builds from **13 MB** to **5 MB** and restoring performance on large client projects.
- Delivered a GrapesJS/Blockly bulk-email workflow capable of batching **1,000** emails per batch, empowering clients with high-volume automated communications.
- Built 10+ client-specific features using GrapesJS & Blockly, translating requirements into reusable components.
- Triaged and **resolved** 10+ production incidents, cutting Mean Time to Recovery (MTTR) by **50%** and boosting customer satisfaction.
- Designed backend enhancements that lifted system throughput by **25%**, and automated Docker image/license-key generation, reducing manual steps by **40%**.
- Debugged and **enhanced** the filter API, extending support from strings-only to all data types, enabling seamless client data queries.
- Integrated a Cron scheduler into the builder to automate scripts on custom schedules—cut manual triggers by **80%**, saving 10+ dev hours/week.

Basyo **Remote**
Software Engineer **Apr 2024 – Jun 2024**

- Launched a Minimum Viable Product (MVP) delivering the project under **7 weeks.**
- Spearheaded product development lifecycle for MVP, defining core user flows and UI/UX elements, resulting in **100+** user registrations within the first week of deployment, demonstrating strong product-market fit.
- Scheduled regular meetings with clients to gather requirements and provide updates, maintaining a **95%** client satisfaction rate throughout the project.

NullClass **Remote**
Full Stack Web Development Project Intern **Jun 2023 – Jul 2023**

- Launched chatbot for coding support, automating **80%** of user queries and boosting support efficiency.
- Established and integrated subscription plans, allowing users to select and manage billing options seamlessly.
- Integrated Stripe for secure payment processing, ensuring PCI compliance and robust transaction management.

Projects

AI Forms | *NextJS, Auth.js, Shadcn, Gemini API* | Github **Oct 2024 – Present**

- Pioneered AI-driven form platform with RAG (Gemini API), cutting user input time by **30%**.

Connectify | *Next.js, Tailwind CSS, Prisma, MongoDB, Pusher* | Github **Jan 2024 – Present**

- Spearheaded a responsive social app with real-time chat, Cloudinary uploads, and a Prisma/MongoDB data layer cutting latency by 20%.

Skills

Languages: C, C++, TypeScript, JavaScript
Technologies/Frameworks: MongoDB, ExpressJS, ReactJS, NodeJS, NextJS, Tailwind CSS, Nginx, AWS EC2, GrapesJs, Docker

Education

Netaji Subhas University of Technology **New Delhi**
Bachelor of Technology in Electronics and Communication Engineering **Dec 2020 – May 2024**
